

# EXTREME MAX™ Carbides

## Carve up the trails...

With snowmobile traction products from Extreme Max™ Racing

Made in the USA

Extreme Max™ Wear bars are made from high strength alloy steel, the strongest in the snowmobile industry. This gives you the best wear and least breakage. All Trail Max and Race Max competition wear bars feature a carbide grade insert mounted on a 7/16" or 1/2" host bar for improved handling and control. The Wear-Ever 55 Rockwell hard weld wear surface gives you exceptional wear resistance and longer life.

The mounting studs are resistance-welded around the entire stud for maximum strength, not a spot-weld like other bars on the market. Then we paint them black for a finished look and maximum rust resistance. All Extreme Max wear bars come with nyloc nuts. Extreme Max™ gives these bars a **two-year limited warranty** against workmanship and defects.

### Trail Max 4"

The Trail Max 4" is a very popular wear bar. It has 4" of 90° carbide on a 7/16" host bar for good steering control and long life. Trail Max offers a 1" carbide wear pad both front and back with a full length hard weld surface between all carbide inserts. Extra-long studs ensure easy fit with ski skins. Ideal for older or smaller snowmobiles. All 4" Trail Max wear bars are painted black to prevent rust build up. Comes complete with new nyloc nuts. This bar carries a **two-year limited warranty** against workmanship and defects.

4"

### Trail Max 6"

The Trail Max 6" is by far our most popular wear bar. It has 6" of 90° mining grade carbide on a 7/16" host bar. This is specifically designed to handle mid-range and high performance machines with and without studded tracks. Perfect for trail runners and performance riders. Two one-inch wear pads front and back, with a full length hard weld between all carbide inserts provide the best wear resistance for the money. The studs are fully welded to insure racing durability. Trail Max wear bars are painted black to prevent rust build up, complete with nyloc nuts. The 6" Trail Max wear bar has a **two-year limited warranty** against workmanship and defects.

6"

## Designed to give you safety and control while providing the edge you need.

### Race Max 8"

Everything the true enthusiast looks for in a high performance wear bar. This is the ultimate carbide runner designed for long life. It is made to grip without rolling in the corners. This competition bar comes standard with a full 1/2" flat top high strength alloy steel host bar, front and rear 1.5" carbide wear pads and 8" of 60° angled competition grade carbides. It has full-length hard welds between all carbide inserts. The studs are full welded. All 8" Race Bars are powder coated black to prevent rust build up and give a finished competitive look. The Race Max wear bar has a **two-year limited warranty** against workmanship and defects. Nyloc nuts included. This wear bar is not for the timid or the weak, it is in a class by itself.

8"

### Ice Max 10"

These competition bars are on the edge. For the need to turn. The Edge of technology. The Ice-Max™ is 10" of 60° Carbide set in a 1/2" milled host bar that can be sharpened. For closed course competition only. Works on all skis because you can put the studs where you need them. New sled's, Old sleds, Ice Racer's Lake Racer's, and if you "Dare" Aggressive trail carving. These bars can be sharpened over and over. **Warning - For competition use only. Competition product offer no warranty of any kind or is the manufacturer responsible for accidents. "NOTE: Stud placement welding is required."**
